### We are looking for an Analytical Chemist (MSc, PhD)

**Activities:**

The analytical chemist is responsible for the analysis results and research reports. The candidate will also be involved in the validation and implementation of new methods, mainly in the field of food and industrial chemistry. The activities are performed according to the ISO 17025 quality assurance system. The work includes extraction and chromatography of a large range of matrices. The compounds of interest are analysis using state-of-the-art analytical instruments, including GC-MS/MS and UPLC-MS/MS.

**Requirements:**

You are a trained chemist at an academic level. You are an enthusiastic and accurate professional. You are fluent in Spanish and can speak and write English on a professional level with good interpersonal & communication skills. You have the ability to conduct, plan, coordinate and implement research and development of new chromatography methods. You are also our management support for our Laboratory in Peru.

**We offer:**

A dynamic position in an open en informal organisation. A position with responsibilities and opportunities for personal growth.

All interested candidates are encouraged to apply. The contract is for one year with the opportunity for a contract for indefinite time with a competitive salary.

If you have additional questions you can contact dr. Hassan el Khallabi or dr. Bert van Tol (+31 (0)15 2572511).

If you are interested in this position mail your application, including resumé and motivation to Benjamin van Mourik.
